PRESENTACIÓN DE *EL MINI VISUAL*

El Mini Visual, con más de 3.600 ilustraciones y miles de términos generales y especializados, constituye una inestimable fuente de conocimientos presentados de una manera clara y atractiva.

POLÍTICA EDITORIAL

El Mini Visual ofrece un inventario visual del entorno físico de cualquier persona que viva inmersa en la actual era tecnológica y que conozca y utilice un considerable número de términos especializados procedentes de una amplia variedad de disciplinas.

El presente diccionario, destinado al público general, intenta dar respuesta a las necesidades de cualquier persona que necesite saber la correspondencia precisa y correcta de determinados términos por muchas y variadas razones, ya sean personales o profesionales, como por ejemplo hallar un término desconocido, comprobar el sentido de una palabra determinada, complementar un trabajo publicitario, preparar material didáctico complementario, etc.

La selección de los contenidos de *El Mini Visual* se ha realizado en función de las necesidades de su público objetivo y, por consiguiente, pretende reunir en un volumen todos los términos técnicos que se necesitan para expresar el mundo contemporáneo y los ámbitos especializados que conforman nuestra realidad cotidiana.

ESTRUCTURA DE EL MINI VISUAL

La presente obra consta de tres grandes apartados: las páginas de introducción, que incluyen una lista con los temas tratados así como un índice general, el cuerpo del texto, con el tratamiento detallado de cada uno de los temas, y finalmente el índice alfabético.

La información se presenta ordenada de lo más abstracto a lo más concreto siguiendo la siguiente secuencia: tema, subtema, título, subtítulo, ilustración y terminología.

El contenido de *El Mini Visual* está dividido en 17 TEMAS que van desde la Astronomía a los Deportes. Por su parte, los TEMAS que presentan una especial complejidad se hallan divididos en SUBTEMAS. Así por ejemplo, el tema Tierra está dividido en Geografía, Geología, Meteorología y Medio Ambiente.

El TÍTULO cumple varias funciones: por un lado, designa la ilustración de un objeto único sobre el cual se presentan e identifican las distintas partes que lo constituyen (por ejemplo, glaciar, ventana), o bien engloba bajo una sola designación a distintas ilustraciones que pertenecen a la misma esfera conceptual pero que están representadas por una serie de elementos distintos, cada uno de los cuales posee su propia designación y su propia terminología (por ejemplo, la disposición de los continentes o los electrodomésticos).

En algunos casos, los términos de rango superior de una clase de objetos se han englobado bajo el mismo SUBTÍTULO, cada uno con su propia denominación pero sin un análisis terminológico detallado (por ejemplo, bajo sondas espaciales encontramos ejemplos de sondas espaciales).

Por su parte, la ILUSTRACIÓN contribuye a mostrar de un modo realista y preciso el objeto, proceso o fenómeno representados, así como los detalles más pormenorizados que los conforman, aunque también funciona a modo de definición visual de cada uno de los términos presentados.

TERMINOLOGÍA

Cada uno de los términos que se incluyen en *El Mini Visual* ha sido cuidadosamente seleccionado después de un riguroso examen de la documentación pertinente procedente de fuentes con un nivel de fiabilidad y de especialización adecuados.

Puede haber algunos casos en que se hayan utilizado distintos términos para hacer referencia al mismo ítem, en cuyo caso se ha optado por elegir el término utilizado con mayor frecuencia por las autoridades más competentes en la materia.

El Mini Visual consta de 13.750 entradas y más de 23.700 términos españoles con su correspondiente equivalente en inglés.

Los ÍNDICES incluyen una lista de todas las palabras del diccionario ordenadas alfabéticamente.

MÉTODO DE CONSULTA

Para consultar el contenido de *El Mini Visual* se puede proceder de distintos modos:

- A partir de la lista de TEMAS que se adjunta al final de la obra o en las páginas introductorias se puede acceder al léxico relacionado con ese tema.
- A partir de los ÍNDICES se puede consultar una palabra determinada para comprobar su correspondencia o su adecuación al concepto acudiendo a la ilustración con la que se representa.
- El aspecto más original de *El Mini Visual* es que las ilustraciones permiten a su usuario hallar una palabra aunque sólo tenga una vaga idea de a qué hace referencia. En este sentido, el presente diccionario posee un modo de consulta único en su género que lo distingue de cualquier otro diccionario en que el usuario necesita conocer previamente la palabra consultada.

COLORES DE REFERENCIA

Tanto en el lomo como en la cubierta posterior del libro aparece un esquema de los colores de referencia utilizados para identificar cada uno de los temas con el objeto de facilitar la consulta del apartado correspondiente.

TÍTULO

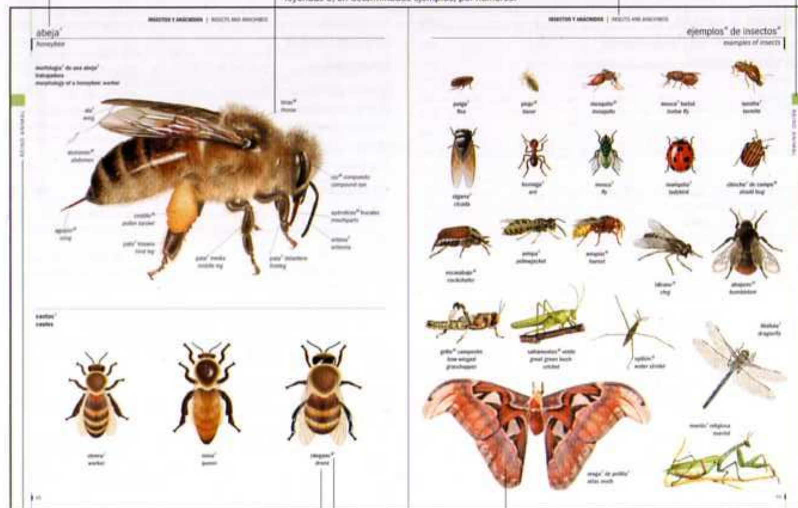

Aparece destacado en español con su equivalente en inglés, en letra itálica. Si el título se repite en páginas sucesivas, en las páginas siguientes a la página principal aparece destacado en gris y sólo en español.

SUBTEMA

La mayoría de temas están divididos en subtemas que se han incluido tanto en español como en inglés.

FILETE

Unen la palabra con el elemento señalado salvo en aquellos casos en los que un exceso de filetes habría dificultado la lectura y en los que se han sustituido por un código de colores con sus correspondientes leyendas o, en determinados ejemplos, por números.

TEMA

Siempre aparece en español, que es la lengua principal de la edición.

ILUSTRACIÓN

Constituye esencialmente la definición visual de los términos con los que va asociada.

TÉRMINO

Cada término figura en el índice junto con una remisión a las páginas en las que aparece. Cada término está en las lenguas del diccionario, aunque la entrada principal corresponde a la voz española.

MARCAS DE GÉNERO

F: femenino M: masculino

Para cada término se indican todos los géneros de las palabras que lo constituyen.

Los personajes que aparecen en el diccionario son masculinos o femeninos cuando la función que ilustran puede ser realizada por ambos sexos, en cuyo caso el género asignado a la palabra correspondiente depende de la ilustración. De hecho, dicha palabra suele ser femenina o masculina dependiendo del sexo de la persona implicada.
